# OKOGBO FAITH

**FRONT-END DEVELOPER**

I find web development fascinating, the ability to transform designs to actual websites is simply awesome.

## EDUCATION

### BSC. COMPUTER SCIENCE
University of Benin, Nigeria
2017 - 2022

### FRONTEND DEVELOPMENT
Self taught
2021 - present

## MY SKILLS

### SOFT SKILLS

- Interpersonal skills
- Communication
- Adaptability/Flexibility
- Social skills

### TECHNICAL SKILLS

- HTML5
- CSS3
- SCSS
- Javascript
- Typescript
- React
- Next JS
- GraphQL
- APIs
- Git
- Redux

## EXPERIENCE

### FRONTEND DEVELOPER

Portfolio| 2021 - present

- REST countries API: I made use of a REST API to get information about the countries of the world. The countries are split into regions and a user can chose to view countries from a certain region. The user can also search for a country via the search bar.
- Buybuy store: This is an online shopping site I used to practice Redux. I designed and developed the site with React, Typescript, SASS and I used Axios for API calls.
- Chat app: I made use of socket.io to create a chat application. where users can see messages sent by other users in a group-like setting.
- IP address tracker: I created a simple IP tracker that made use of an API to return information when an IP address is entered in the search bar.
- Interactive Comment section: I created a comment section where user can post comment, edit it and even delete it. This project uses local storage.
